

Precautions for Use

These instructions are to ensure the product is used correctly, safely, and to prevent any possible risk or damage to the user and/or others people. Our company shall not take any responsibility for any failure of product, malfunction and damages caused by improper use by the user or third parties.

- ① YOU MUST DO THIS
- ⊘ DO NOT DO THIS

PLEASE KEEP THESE INSTRUCTIONS
FOR YOUR SAFETY

- ① Only use on applicable liquids written on the specifications.
- ① Keep the power supply adapter out of direct sunlight, water vapor, soft coal, dust, and damp air etc.
- ① Wash and clean out the outlet, plug, and plug blades regularly.
- ① Make sure to hold on the plug and pull it out from the outlet. (Do not pull off the cable)
- ① If the power supply adapter falls into the water, pull the plug out and do not reuse it.
- ① When disposing of pump, make sure to have it completely destroyed so that others won't use it again.
- ① When you hand it over to another person, be sure to give them the instructions too.
- ① Make sure to remove any left-over liquid in the discharge hose after each use.
- ① Make sure to turn off the power after using the pump.
- ① Use it in a well-ventilated area since the power supply adaptor becomes a little hot.
- ① When cleaning up the pump, do not use thinner, benzene, organic solvent, or glass cleaners.
- ① Make sure to detach the pump from the tank when moving and storing the tank.
- ⊘ Do not touch and operate any plug or power supply units with wet hands.
- ⊘ Do not use when the cable and plug is damaged or if plug is loose on outlet.
- ⊘ Do not refuel directly while the vehicle or equipment is turned on.
- ⊘ Do not leave the pump unattended while in use.
- ⊘ Do not allow children to operate the product without adult supervision.
- ⊘ Do not get power cord damaged, bent, pulled, twisted, or bound.
- ⊘ Do not get the plug and outlet wet whether in or not in use.
- ⊘ Do not alter or disassemble the pump.
- ⊘ Do not run the pump 'dry' or let the pump idle without transferring.
- ⊘ Do not shock the pump and power supply adapter. Also do not make the power cord tense.
- ⊘ Do not use deteriorated or contaminated liquids and fuels.
- ⊘ Do not use this pump for hot liquids above 40°C (104°F).

CADDY TANK PUMP

INSTRUCTIONS AND PRECAUTIONS

※ Read all instructions and precautions before use.

MODEL: EF-03-CP

www.easyflo.com.au

Specifications

Delivery volume	Approx. 9.8 LPM (2.6 GPM) with gasoline	Operating temperature	+5°C ~ 40°C (41°F ~ 104°F)
Suction pipe length	Approx. 800mm (31.5")	Operating voltage	DC 12V
Discharge hose length	Approx. 3m (9.8ft)	Duty Cycle (how long can the pump be used continuously)	Maximum 15 minutes on, Minimum 30 minutes off
Applicable liquids	Petrol, diesel, kerosene, non-potable water		

How to Store

When the pump will not be used for long periods of time, take the pump out of the tank, make sure no remaining fuel is in the hose, and wipe it down with a cloth before storing it.

Be careful to not damage the auto-stop nozzle's sensor during usage and storage.

Names of Parts

Directions for Use

- Insert the suction pipe into the tank.
 - Fasten the pump's joint nut tightly.
 - Connect power supply.
 - Attach the auto-stop nozzle to the receiving tank using the clip. Make sure the discharge nozzle is in a vertical position.
 - Turn switch on to start flow.
 - Pump will automatically stop and buzzer will sound when the liquid reaches the stop line.
 - Turn switch off to stop flow.
 - Let the left-over liquid in the hose flow back into the tank.
 - Disconnect power supply.
 - Be careful to not damage the auto-stop nozzle's sensor during usage and storage.
- *After use, disconnect the pump and fasten the container's cap to prevent fuel evaporation.
